

# AUDACITY PRACTICE PROJECT

Inside their Audacity folder students need to create a **Practice Project folder**.

Students will visit [www.freeplaymusic.com](http://www.freeplaymusic.com) or any of the copyright free web sites and download two songs from either site download into the **Practice Project folder**. Students then use [www.google.com](http://www.google.com) to find a web site with .wav files. Students will download 5 sounds into their **Practice Project folder**.

Students will now open the audacity program and use the import audio command located on the project menu to import your songs. Save project as Practice Project inside the **Practice Project folder**.

Students will add a new track to their audacity Practice Project file using the add new stereo track command on the project menu. Next students will cut a ten second clip from the first song and paste it to the new audio track. Students will then import one of the five .wav files (sounds) using the Import Audio command on the project menu. Use the **Time Shift Tool** to move the waveform to the end of the song clip. Continue by adding a 10 second clip from your second song and alternating .wav files (sounds) in between. When finished you can close the two songs and save the audacity Practice Project again.

Students will fade in at the beginning and fade out at the end of all song clips. Students will also add a different effect to each of the sound clips. You can add the effect to the whole clip or part of the clip.

When finished, students should again save the project and export a Practice Project.wav file to the **Practice Project folder** and then copy their entire **Practice Project folder** to the [student grading folder](#) for me to grade.

## EVALUATION

Criteria		Point Values					
Adequate Number of Song and Sound clips		5	4	3	2	1	0
Quality of effect application		5	4	3	2	1	0
Quality of fade in and out		5	4	3	2	1	0
Other Tutorial Instructions Followed		5	4	3	2	1	0
Folder Directions Followed		5	4	3	2	1	0
Overall Quality of Project		5	4	3	2	1	0
Total
